

STARTUP QATAR INVESTMENT PROGRAM

Board governance. One meeting workflow.

An AI-assisted platform for boards and committees.
Multilingual workflows on the development roadmap.

Live MVP · Pre-revenue · Seeking USD 1,000,000

نايف المحمدي

Naif Almohammdi

Founder · Jeddah, Saudi Arabia

Formal meetings still depend on fragmented work

The board secretary connects documents, messages and decisions by hand.

Before the meeting

Invitations, agendas and attachments sit across separate files and messages.

During the meeting

Attendance, voting and discussions need consistent documentation.

After the meeting

Minutes and resolutions take repeated drafting. Approval and follow-up can lose continuity.

A connected record for the meeting and its decisions

Majalis structures the work around the organization, meeting type and agenda.

01

Prepare

Meeting details, participants, invitations and agenda

02

Run

Attendance, voting and recorded discussions

03

Document

Minutes, resolutions and printable outputs

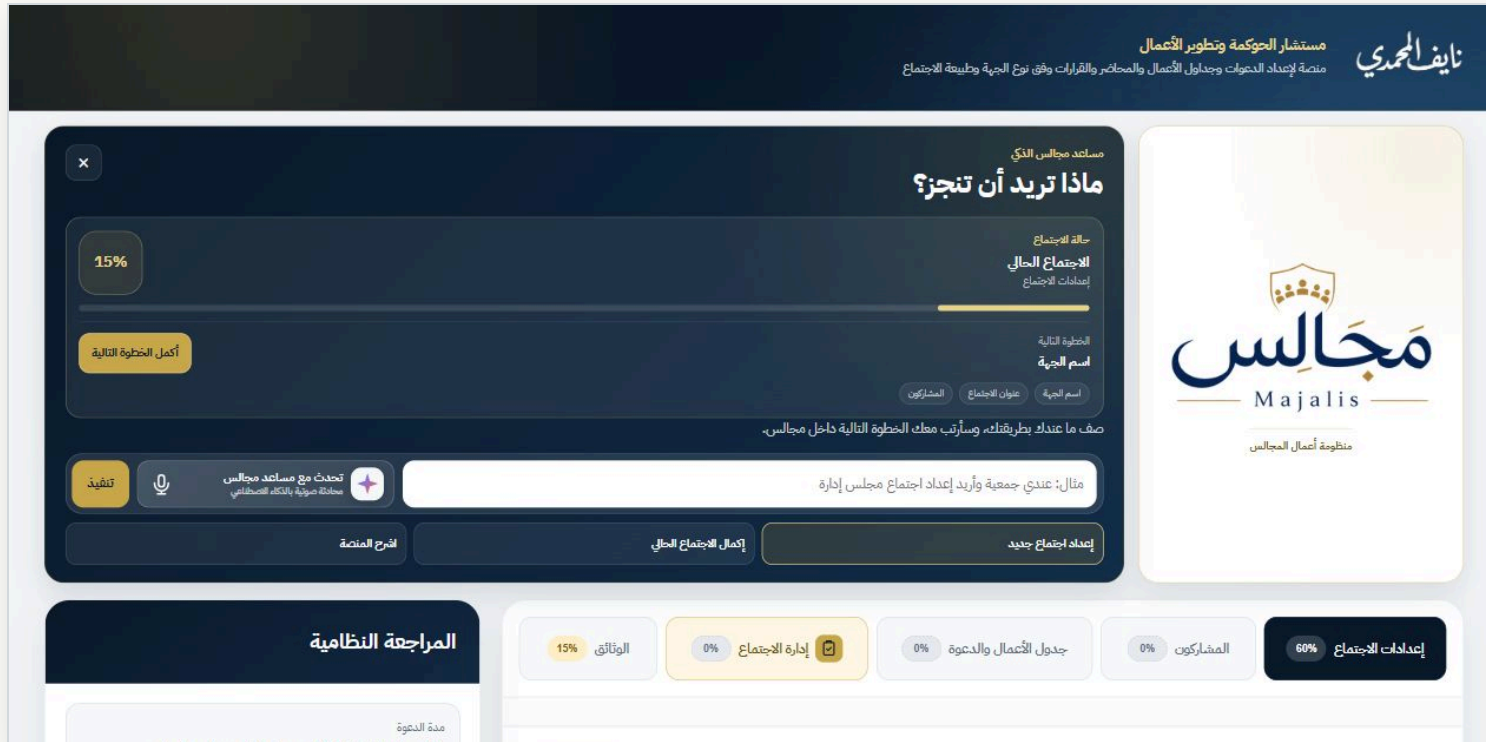

04

Follow through

Planned ownership, deadlines and action tracking

The live MVP covers preparation, meetings and document generation. Structured action tracking is part of the funded roadmap.

A working Arabic MVP

Available today

- Meeting setup and participants
- Agendas and invitations
- Attendance and voting
- Minutes and resolutions
- Printable document packages
- AI assistant and cloud administration

Open the live product

Actual interface, captured 6 October 2026. Qatar-specific templates and enterprise controls remain planned development.

Two organizational trials support practical use

Jun 2026

First usable MVP launch

2

Organizations in early trials

USD 0

Revenue to date

Trial settings

A nonprofit association and a limited liability company tested the MVP in mid-2026.

Founder-reported observations

Easier voting and semi-automated drafting of invitations and minutes.

Next evidence to collect

- Time to prepare and approve minutes
- Repeated use across meetings
- Willingness to pay and subscription conversion
- Customer retention after onboarding

Qualitative founder-reported trials. No paid traction, quantified productivity gain or independent compliance certification is claimed.

A focused customer base for Qatar, then the Gulf

Family and private companies

Boards and committees that need consistent meeting records.

Nonprofit and professional associations

Recurring formal meetings with practical documentation needs.

Board secretaries and governance advisers

Users who manage repeated workflows across several organizations.

INITIAL BUYER

**The board secretary,
governance lead
or chief executive.**

Market sizing approach

Build a Qatar account list by segment, validate annual contract value through pilots, and calculate reachable subscription revenue.

TAM and SAM require further validation. No unsupported market-size estimate is included.

Regional competition

The development file identifies six relevant Saudi and Gulf platforms.

PLATFORM	PRODUCT FOCUS	WEBSITE
Majles Tech	Boards, committees and general assemblies	majles.tech
Almajles	Boards, assemblies and shareholder records	almajles.com
Diwan Suite	Meeting governance and decision execution	diwansuite.com/en
BoardZ	Board and governance management	boardz.tech/ar
Board Link	Board and committee workspace	board-link.com
Mithaq	Bilingual board management in Oman	mithaq.om

Product focus summarizes public positioning. Majalis does not claim exclusive Arabic capability or feature superiority.

International competition

Established board portals also serve Majalis's target customer groups.

PLATFORM	PRODUCT FOCUS	WEBSITE
BoardPro	Board workflows for SMEs and nonprofits	www.boardpro.com
OnBoard	Board management and governance tools	www.onboardmeetings.com
Boardable	Nonprofit board collaboration	boardable.com
Diligent Boards	Enterprise board management and AI	www.diligent.com/products/boards
Sherpany	Executive and board meeting management	www.sherpany.com
iBabs	Board meetings, documents and governance	www.ibabs.com/en

AI and meeting automation already appear in competing products. Execution, adoption and customer fit will determine differentiation.

Connected governance with a multilingual roadmap

Majalis aims to make formal governance easier to start and repeat.

Connected governance workflows

Meetings, voting, minutes and resolutions in one workflow, informed by regional governance practice.

Accessible entry

A public MVP lets prospective users try a workflow before a commercial discussion.

Multilingual development

Arabic and English workflows first, followed by additional languages according to validated customer demand.

The current MVP operates in Arabic. Multilingual support, enterprise controls and deeper integrations are planned development.

Annual subscriptions per organization

ENTRY

Basic

Core meeting and document workflows for smaller organizations.

RECURRING USE

Pro

Team access, cloud archive, templates and recurring workflows.

COMPLEX NEEDS

Enterprise

Planned integrations, service commitments and private deployment options.

Expansion revenue

Onboarding and training, custom integrations, and planned signing services through licensed providers.

Proposed commercial packaging. Pricing, annual contract value, acquisition cost and retention will be validated through paid pilots.

Qatar operations with measurable pilot milestones

Months 0–3

Establish and discover

Founder-led setup, technical leadership hire, customer interviews and a qualified account list.

Months 4–6

Run structured pilots

Proposed target: 5 Qatar organizations. Test workflows, onboarding and pricing.

Months 7–12

Convert to subscriptions

Proposed target: 15 paying organizations. Measure recurring use and customer retention.

Months 13–24

Expand through partners

Proposed target: 50 paying organizations across Qatar and selected Gulf accounts.

Execution starts after acceptance and funding. Proposed targets depend on funding milestones, hiring and pilot conversion.

Enterprise readiness built in stages

-
- | | | |
|---|-----------------------------------|------------|
| 01 | Core platform and security | Months 0–6 |
| Organization accounts, roles, permissions, audit logs, data isolation and tested backup recovery. | | |
-
- | | | |
|--|------------------------------|-------------|
| 02 | Operational workflows | Months 4–12 |
| Action owners and deadlines, board packs, notifications, and Arabic and English workflows.
Additional languages follow customer demand. | | |
-
- | | | |
|---|---|--------------|
| 03 | Integrations and trusted signing | Months 10–18 |
| Calendars, document systems and licensed signing providers, prioritised by customer demand. | | |
-
- | | | |
|---|------------------------------|--------------|
| 04 | Enterprise deployment | Months 16–24 |
| SSO, APIs, service commitments, deployment choices and further security validation. | | |

AI assists drafting and workflow navigation. Authorized users review and approve outputs. Qatar localization requires local validation.

Founder experience in governance and investment

نايف المحمدي

Naif Almohammdi

Founder and product lead

25+ years

Executive and advisory experience

Board governance

Founding member and board member of the Restaurant & Café Owners Association since 2020.

Investment and institutional decision-making

Experience in investment committees, family-business governance, asset development and deal structuring.

Team build after funding

Hire a CTO / Technical Lead, product engineers and a Qatar business development / customer success role.

Majalis currently has one founder and no technical employees. The founder developed the MVP in-house and plans full-time commitment and Qatar residency after acceptance and funding.

Investment request

REQUESTED INVESTMENT

USD

1,000,000

To build the technical team, strengthen the platform and establish Qatar operations.

Structure, valuation and milestones are subject to agreement with the program.

Proposed allocation

Engineering and technical leadership	45%	\$450,000
Cloud, security and product quality	20%	\$200,000
Qatar market entry and customer success	20%	\$200,000
Company setup and professional support	5%	\$50,000
Operating reserve	10%	\$100,000
Total	100%	\$1,000,000

Planning allocation prepared for the Qatar proposal. It is not an approved operating budget or a historical financial statement.

Investment milestones reduce the main risks

RISK	RESPONSE	EVIDENCE TO REVIEW
Single-founder dependency	Technical leadership hire and documented ownership of code	Team in place and repeatable release process
Pre-revenue demand	Structured pilots followed by paid subscription offers	Conversion, repeated use and retention
Sensitive meeting records	Access controls, isolation, logging and tested recovery	Security review and recovery tests
Strong existing competitors	Focused customer segments and simpler onboarding	Win/loss reasons and customer feedback
Qatar localization	Local customer and professional validation before broader rollout	Validated templates and deployment requirements

Proposed reporting links product releases and spending to customer evidence and operational readiness.

MAJALIS IN QATAR

A live MVP. A committed founder. A clear funded plan.

Qatar as the next reference market
for board and committee software.

Requested investment: **USD 1,000,000**
